

Friesen's Custom Cabins

Palmer, Alaska

Building Alaskan Dreams

November/December 2009

It is time!

Every year after the Alaska State Fair we start looking for our studded tires and bunny boots. For some reason I never can remember where I left them even though I promise myself it will be different...

Next year.

My First Cabin

My first cabin was a 13' trailer with a 4 x 8 lean to. The lean-to had a wood stove in it that almost kept the place warm. Many mornings I woke up with an icy beard though.

Cabin Kits

Finally after all these years, we are producing kits for the do-it-yourselfers. We have been asked for years about kits but we didn't feel there was a

market for them. Judging by the number of phone calls and emails we have gotten, we now feel it is time.

The first kit is a 16 x 24 plan #5 and we will be producing more as requests come in, so give us a call or email and we'll put a package together.

Winter Schedule

Our Winter schedule is starting to get pretty busy. Much of our work is done in the Winter when everything is frozen and easier to get to. If you have a project off the road system that you want to get started on, give us a call and we can get it going for you this coming season.

New Plans

We will have sample floor plans for each model in November 2009 and we are also introducing a Plan #10 and a duplex model as well in December.

Current Projects

In 2009 we have had projects on the Kenai Peninsula, Copper River Basin, Talkeetna and Willow. This winter we will be working at Lake Louise and on several off-road projects West of the Parks Hwy.

Prices

Pricing has remained fairly constant for the past two years and we don't look for any changes until January of 2010.

*We at Friesen's Custom Cabins wish all of you a
Happy Thanksgiving, Merry Christmas
and a Happy New Year!*
